

A Declaration of U.S. Health Collaborating Centers

April 28, 2020

We are from institutions across the United States designated as Collaborating Centers with the World Health Organization (WHO). We work on infectious diseases like COVID-19 and other public health issues, such as healthy housing, occupational health and safety, tobacco, and many other determinants of health.

At a time when nations around the world are struggling with the current pandemic, President Trump's attempt to withdraw funding from WHO will harm us all. This is not the time to take the tires off the ambulances; we need more ambulances!

We call on the president and Congress to restore and increase funding for WHO immediately.

The Collaborating Centers and the institutions where they are located typically donate time, expertise, and other resources to improve health around the globe. The WHO is needed to coordinate this massive effort.

In addition to increasing testing, training, research, and capacity to respond to the current pandemic, we have worked with WHO to address other related matters. For example, with all of us spending more time in our homes, we have helped WHO craft its new guidelines to ensure that those homes are both healthy and safe. We have advanced occupational health and safety to protect workers who are placed in harm's way as they do their jobs. We have provided critical guidance on medical devices (including ventilators) and their use, specifications, and procurement (primarily for the Americas). We have helped to respond to health inequities, food insecurity, and many other areas of need that have become even more pronounced during this pandemic.

We have worked on public health ethics, including the 2015 WHO training manual, *Ethics in Epidemics, Emergencies and Disasters: Research, Surveillance and Patient Care*. We have contributed to a monitoring and evaluation system to track COVID-19 response activities in the African region.

We have collaborated to reduce the toll of non-communicable diseases, including tobacco and to support implementation of the WHO Framework Convention on Tobacco Control. We have sought to improve the health of older adults through research and training. We have increased access to care for the underserved, including rural, urban, and incarcerated populations. We have improved safety, quality, and effectiveness of traditional and complementary medicine in primary health care.

All these activities have benefited the United States, as well as other countries.

Now more than ever, we need WHO to carry out its mission. Now is not the time to get in the way and point fingers. Now is the time to do all we can to find solutions.

Mr. President and Members of Congress, you have the power to help citizens around the world and here in the U.S. who are struggling with this virus and many other health challenges. Please support the mission and capacity of the World Health Organization.

The opinions expressed here are those of the authors, not the World Health Organization. Institutions are listed for identification purposes only.

Signed,

David E. Jacobs, PhD, CIH
Director, WHO Collaborating Center for Healthy Housing Training and Research
Chief Scientist, National Center for Healthy Housing

Amanda Reddy
WHO Collaborating Center for Healthy Housing Training and Research,
Executive Director, National Center for Healthy Housing

Linda Forst, MD, MPH
Director, WHO Collaborating Center at the Great Lakes Center for Occupational and Environmental
Safety and Health
Senior Associate Dean, University of Illinois at Chicago

Abdulgafoor M. Bachani, PhD, MHS
WHO Collaborating Center for Injuries, Violence and Accident Prevention
Associate Professor, International Health; Director, Johns Hopkins International Injury Research Unit

David O. Carpenter, MD
Director, WHO Collaborating Center for Environmental Health
Institute for Health and the Environment at the University at Albany (NY)

Chun-Tao Che, PhD
Director, WHO Collaborating Center for Traditional Medicine
Professor, College of Pharmacy, University of Illinois at Chicago

Cheryl J. Cherpitel, DrPH
Director, WHO Collaborating Centre on Alcohol Epidemiology and Injury
Senior Scientist, National Alcohol Research Center
Adjunct Professor, University of Victoria, School of Nursing, Victoria, BC

Tobey Clark, Director, CCE, CHTM, FAAMI, FACCE
WHO Collaborating Center for Health Technology Management
Technical Services Partnership, University of Vermont

Patricia Davidson
Co-Director, WHO Collaborating Center for Nursing Knowledge, Information Management and Sharing
Secretariat WHO Collaborating Centers for Nursing and Midwifery
Johns Hopkins School of Nursing

George Delclos, MD, MPH, PhD, FCCP
Director, WHO Collaborating Centre in Occupational Health
University of Texas Houston Health Science Center School of Public Health

Stan Deresinski, MD
Co-Director, WHO Collaborating Center for Antimicrobial Resistance and Stewardship
Stanford University School of Medicine

Jennifer Dohrn, DNP, CNM, FAAN
Director, PAHO/WHO Collaborating Center for Advanced Practice Nursing
Associate Professor of Nursing, Columbia University School of Nursing,
Assistant Dean, Office of Global Initiatives

Stephen Fawcett, PhD, and Vincent Francisco, PhD
Co-Directors, WHO Collaborating Centre for Community Health and Development
University of Kansas

Beth J. Feingold, Assistant Professor
Co-Director, WHO Collaborating Center for Environmental Health
Department of Environmental Health Sciences, University at Albany (NY) School of Public Health

Lorraine Frazier, RN, PhD, FAAN
WHO Collaborating Center for Advanced Practice Nursing
Dean and Mary O'Neil Mundinger Professor, Senior Vice President, Columbia University Medical Center

Joanna Gaitens, PhD, RN
Co-Director, WHO Collaborating Center for Occupational Health
University of Maryland School of Medicine

Stanton Glantz, PhD
Director WHO Collaborating Centre on Tobacco Control Policy
Professor of Medicine, University of California San Francisco

Michael Glasser, PhD
National Center for Rural Health Professions, University of Illinois – Rockford
